Randall Owen, MD, FACS
Attending, Endocrine Surgery
Head & Neck Surgery
The Mount Sinai Hospital
Associate Professor of Surgery,
Icahn School of Medicine at Mount Sinai

Hyun Suh, MD
Attending, Endocrine Surgery
Robotic & Minimally Invasive Surgery
Mount Sinai Beth Israel
Assistant Professor of Surgery,
Icahn School of Medicine at Mount Sinai

Endocrine Surgery at Mount Sinai Beth Israel and The Mount Sinai Hospital
Specializing in Endoscopic, Robotic and Minimally Invasive Techniques
The Department of Surgery at the Mount Sinai Health System is working to bring our specialists closer to you. Disease-focused teams of experts have been assembled around thyroid, parathyroid, neuroendocrine pancreas and adrenal disorders to deliver highly professional, comprehensive and coordinated care. Our teams of fellowship-trained surgeons, numerous allied specialists, and ancillary staff are committed to our mission of clinical excellence, education, the advancement of science, and personalized comprehensive patient care. Our surgeons specialize in the latest and most novel approaches. Procedures are performed in our state-of-art minimally invasive operating suites, affording patients improved cosmetic results, shorter hospitalization, and quicker recovery.

### Conditions We Treat

**Adrenal Disease**
- Adrenal cancer
- Adrenal nodules
- Cushing's Syndrome
- Hyperaldosteronism
- Pheochromocytoma

**Genetic Endocrine Syndromes**
- Multiple Endocrine Neoplasia Type I & II

**Pancreatic Endocrine Disease**
- Gastrinoma
- Glucagonoma
- Insulinoma
- Pancreatic neuroendocrine tumors
- VIPoma

**Parathyroid Disease**
- Hyperparathyroidism
- Parathyroid nodules

**Thyroid Disease**
- Graves' disease
- Hyperthyroidism
- Thyroid cancer
- Thyroid nodules & goiters

### Treatment Options

**Adrenal Surgery**
- Laparoscopic adrenal surgery

**Pancreatic Surgery**
- Laparoscopic pancreatectomy
- Laparoscopic tumor resection

**Parathyroid Surgery**
- Focused parathyroidectomy
- Parathyroid hormone monitoring
- Reoperative surgery for recurrent disease

**Thyroid Surgery**
- Endoscopic thyroid surgery
- Fine needle biopsy and genetic testing
- Intraoperative nerve monitoring
- Neck lymph node dissections
- Partial or total thyroidectomy
- Robotic thyroid surgery
- Voice evaluation

### Advanced Approaches

**Minimally Invasive Surgery**

**Bilateral Axillo-Breast Approach (BABA) Surgery**
